

Create your own firework display at home!

What you need

- black card
- PVA glue
- salt
- a cup of water,
- watercolour paints
- paintbrush
- glitter (optional)

What to do

1. Use your PVA glue to draw fireworks on the black card.
2. While the glue is still wet, sprinkle some salt over the glue. You will need a thick layer of salt. Make sure all of the glue is covered.
3. Tip the paper to shake off the excess salt.
4. Dip your paintbrush in the water and then in your paint.
5. Carefully dab the paintbrush on the salt fireworks. Watch the colours magically spread!
6. You can use the end of your paintbrush to create white dots with paint. You could also add glitter to make the fireworks sparkle!
